

# Summary of working Group 3: Socio-economic perspectives

---

- Goal: Describe the salient socio-economic changes associated with climate change across the Arctic coastal zone
- Output: A matrix of case studies in the Arctic coastal zone that represent a range of socio-economic changes and the biological and physical characteristics or changes underpinning them (link to other work packages)
- Integrated, place- and context-based

# Next Steps

---

- Develop a writing team to provide input to the matrix
- Identify gaps in the case study work
